Trans+Plus Systems Corp strengthens its position in Quebec, Eastern Canada and North Eastern United States

- Daniel Pelletier, formerly of Infosite Technologies joins the sales team at Trans+Plus Systems Corp.

GUELPH, Ontario—Trans+Plus Systems Corp., known in the transportation industry as a trusted provider of leading edge transportation dispatch and operations management software technology, officially welcomes Daniel Pelletier as their new Regional Sales Representative based out of Montreal, Quebec. Mr. Pelletier, formerly Product and Sales Account Manager of Infosite Technologies Inc., brings with him many years of sales experience from within the transportation software industry.

“Strategically, we wanted to strengthen our presence in the north east region with local representation in Quebec,” said Vince Bull, Business Development Manager for Trans+Plus. “Daniel is fluently bilingual and will be able to offer software demonstrations of our core product, Fleet Manager Professional in both French and English”. “Based out of Montreal, he’ll also be able to offer more localized product support, breaking down any possible language barriers within the region,” Vince Bull added.

Localized representation will help leverage an aggressive sales and marketing campaign to be launched by Trans+Plus designed to target trucking industry decision-makers and influencers in Quebec, Eastern Ontario, Northern New Brunswick, and throughout the North Eastern United States.

“We welcome Daniel in his new role at Trans+Plus,” said Vince Bull. “Daniel brings Trans+Plus Systems Corp a portfolio of new client opportunities.” I definitely look forward to having him as a new addition to my sales team and look forward to increasing the Trans+Plus customer base substantially this year,” Vince concluded.

Daniel Pelletier can be reached in Montreal by phone at (450) 420-9608 or by email at dpelletier@transpluscorp.com.

About Fleet Manager Professional

Fleet Manager Professional is an intuitive, event based, trucking dispatch and freight brokerage software system for integrated fleet and logistics management. It was designed to optimize management of all operations for Asset Based, Broker, 3PL and Private Fleet companies providing LTL, City P&D, Cartage, Truckload, Line haul, freight consolidation and inter-modal container shipping services. A user friendly, Windows client server application developed with a Microsoft® SQL database structure, Fleet Manager Professional offers increased software performance, scalability, reliability, security and wider acceptance of use. Interfaces for accounting, GPS tracking, satellite / mobile communications, mileage calculation, optimized routing, and document imaging are available offering seamless information flow between software applications. Options are also available for ACE automated e-manifesting, EDI, and Freight Assist our on-line order entry, and web-based track and trace system.
